Extra charge of \$1.00 per 100 lbs. for 10 lb. bags.

In producing grass seed mixtures of high quality, it is not only necessary to select each ingredient from pure, clean seed, high in germination, and low in weed content, but to give thought and attention to the blending process. All mixtures blended in our plant are examined before being bagged, for even composition. We take great pride in the appearance of our finished product, and in the knowledge that even our lowest priced mixture does not contain chaff and other substitutes for seed.

Our bags are of excellent material and well designed. They make an attractive display and promote retail sales. Orders received one day are delivered the following day without fail.

We endeavor to give the best possible merchandise and service, and shall consider with favor your suggestions for better cooperation.
